Summaries of Papers – Résumés d'articles 70, 149, 544, 628, 680
Book Reviews – Livres nouveaux 80, 160, 552, 632, 687
Varia 79, 551, 631, 687
Index rerum ad vol. 6 694

Index rerum ad vol. 6

Acid excretion in chronic renal disease, 28

Acidosis (acute metabolic), renal glutamate metabolism in –, 235

Acute renal failure: role of the concentration mechanism in its development (micropuncture studies using diabetes insipidus rats), 128

Acute renal insufficiency, plasma renin activity in –, 115

Adenine nucleotide compounds, concentration in renal cortex and medulla, 217

Adenine nucleotides, effect on renal metabolism, 282

Adrenal steroids, effect on sodium reabsorption in proximal and distal tubule, 188

Aldosterone-binding proteins of various tissues (stereospecific nuclear and cytosol), 297

Alkaline load during chronic renal insufficiency, urinary pH and PCO_2 in response to –, 91

Anabolic steroid, influence on GFR in elderly men and women, 478

Angiotensin II, micropuncture study of its action on tubular sodium and water reabsorption in the rat, 173

Aortic constriction, glomerulotubular balance during –, 437

Arteriovenous fistulae: plethysmographic forearm blood flow studies in maintenance hemodialysis patients with radial –, 673

Azotemia: inhibition of hippurate accumulation in vivo, 140

Binéphrectomie: influence sur le système rénine-angiotensine de l'homme, 612

Chronic renal disease: acid excretion, 28

Chronic renal insufficiency, urinary pH and PCO_2 in response to an increased alkaline load during –, 91

Computer simulation of the nephron, the action of mercurial diuretics, 571

Concentrating mechanism in hypercalcemia, 50

Concentration mechanism: role in the development of acute renal failure (micropuncture studies using diabetes insipidus rats), 128

Diluting mechanism in hypercalcemia, 50

Distal tubule of the rat, water and electrolyte movements, a study by continuous microperfusion, 388

Elaboration de l'urine, étude par microponction chez le Mérion non diurétique et en diurèse par le mannitol, 643

Elaboration de l'urine, étude par microponction chez le Psammomys non diurétique, 553

Elaboration de l'urine, étude par microponctions chez le Rat dans différents états de diurèse, 457

Elderly men and women: glomerular filtration rate in – under the influence of a new anabolic steroid, 478

Electrolyte transport, functional organization in proximal and distal tubule, 247

Electron probe analysis of tubular fluid composition, 350

Erythrocyte sodium transport, further evaluation in control subjects and patients with uremia, 406

Extracellular fluid expansion: effect on net sodium flux in the jejunum of rats, 365

Fibrinolytic hyperactivity in children with acute glomerulonephritis, 81

Glomerular filtration rate in elderly men and women under the influence of a new anabolic steroid, 478

Glomerulonephritis (acute): plasma fibrinolytic hyperactivity in –, 81

Glomerulotubular balance during aortic constriction, ureteral obstruction and venous occlusion in hydropenic and saline-loaded rats, 437

Glomerulotubular balance in the rat kidney, micropuncture study, 418

Glomerulus (human): contractile activity in culture, 1

Glutamate metabolism (renal) in acute metabolic acidosis, 235

Haemodialysis, plasma renin concentration and the control of blood pressure in patients, 329

Hemodialysis, improved needles for –, 542
Hemodialysis, iron transfer from dialysate to patient, 537
Hemodialysis: plethysmographic forearm blood flow studies in patients with radial arteriovenous fistulae, 673
Hemodialysis, risk of bacterial infection resulting from a blood leak, 110
Henle loop, water and electrolyte movements, a study by continuous microperfusion, 388
High altitude*:* response to metabolic acidosis at –, 102
Hippurate accumulation in vivo: azotemic inhibition of –, 140
Hydronephrosis (experimental): study of the response of glomeruli and arteries to hypertension, 598
Hypercalcemia, the renal diluting and concentrating mechanism in –, 50
Hypertension (steroid-saline): response of glomeruli and arteries in experimental hydronephrosis, 598
Medullary interstitial cells: phagocytic role and effect of potassium deficiency on this function, 584
Membranous nephropathy, clinicopathological correlations in idiopathic nephrotic syndrome with –, 498
Mercurial diuretics in a digital computer simulation model of the nephron, 571
Metabolic acidosis (ammonium chloride), response at sea level and at high altitude, 102
Microponction chez le Mérion: étude de l'élaboration de l'urine chez l'animal non diurétique et en diurèse par le Mannitol, 643
Microponctions chez le Psammomys: étude de l'élaboration de l'urine chez l'animal non diurétique, 553
Microponctions chez le rat: étude de l'élaboration de l'urine dans différents états de diurèse, 457
Micropuncture study of the action of Angiotensin II on tubular sodium and water reabsorption in the rat, 173
Nephrotic syndrome (idiopathic) with membranous nephropathy, clinicopathological correlations, 498
Paraaminohippurate, renal tubular secretion in the dog: effect of α-ketoglutarate, 633
Plasma renin activity in acute renal insufficiency, 115
Potassium deficiency: effect on the phagocytic role of renal medullary interstitial cells, 584
Protéinuries permanentes isolées, stabilité évolutive des –, 526
Renal hypertensive rats, pressor responsiveness to renin and angiotensin, 484
Renal Physiology, its contribution to Nephrology, 164
Renin concentration in plasma and the control of blood pressure in patients on maintenance haemodialysis, 329
Rénine et angiotensine, influence de la binéphrectomie, 612
Sodium (total body), regulation in the mammalian organism, 379
Sodium and water reabsorption in the proximal tubule, intrarenal control of –, 247
Sodium and water reabsorption in the rat tubule, micropuncture study of Angiotensin II, 173
Sodium excretion (renal) during oral water loading in man, 11
Sodium flux in the jejunum of rats, effect of an expansion of extracellular fluids on –, 365
Sodium handling in the renal tubule, influence of humoral factors on –, 205
Sodium reabsorption in proximal and distal tubule, effect of adrenal steroids, 188
Sodium transport (erythrocyte), further evaluation in control subjects and patients with uremia, 406
Sucrose transport (anomalous) in toad skin, 317
Tham-Horsfall mucoprotein (uromucoid): distribution in the human nephron, 667
Tubular fluid composition, electron-probe analysis of –, 350
Urea transport (anomalous) in toad skin, 317
Uremia, erythrocyte sodium transport in patients with –, 406
Ureteral obstruction, glomerulo-tubular balance during –, 437

Urinary pCO_2 in response to an increased alkaline load during chronic renal insufficiency, 91
Urinary pH in response to an increased alkaline load during chronic renal insufficiency, 91
Uromucoid: distribution in the human nephron, 667
Venous occlusions, glomerulo-tubular balance during –, 437
Volume expansion (intravascular), effect of acute spinal cord section upon the renal response, 62
Water and electrolyte movements in the loop of Henle and distal tubule of the rat, a study by continuous microperfusion, 388
Water loading, renal sodium excretion during –, 11
